

Torpedo Grass Treatment Area

The northern and eastern portion (yellow line) of Lake Istokpoga will be targeted for torpedo grass treatments starting on July 21, 2008 and extending through August 1, 2008. Imazpyr and Glyphosate will be applied at label rates by Applied Aquatics (the South Florida Water Management District's contractor) to treat up to 200 acres of torpedo grass. These treatments will be small spot treatments not large scale areas. If you need further information contact Steven Gornak of the Florida Fish and Wildlife Conservation Commission at (863)462-5190 (office) or (863) 697-6256 (cell).
